

Integrated Hybrid Cloud Storage & DR for XProtect

Store more, spend less. Add more cameras at higher resolutions and extend retention times while radically reducing storage costs.

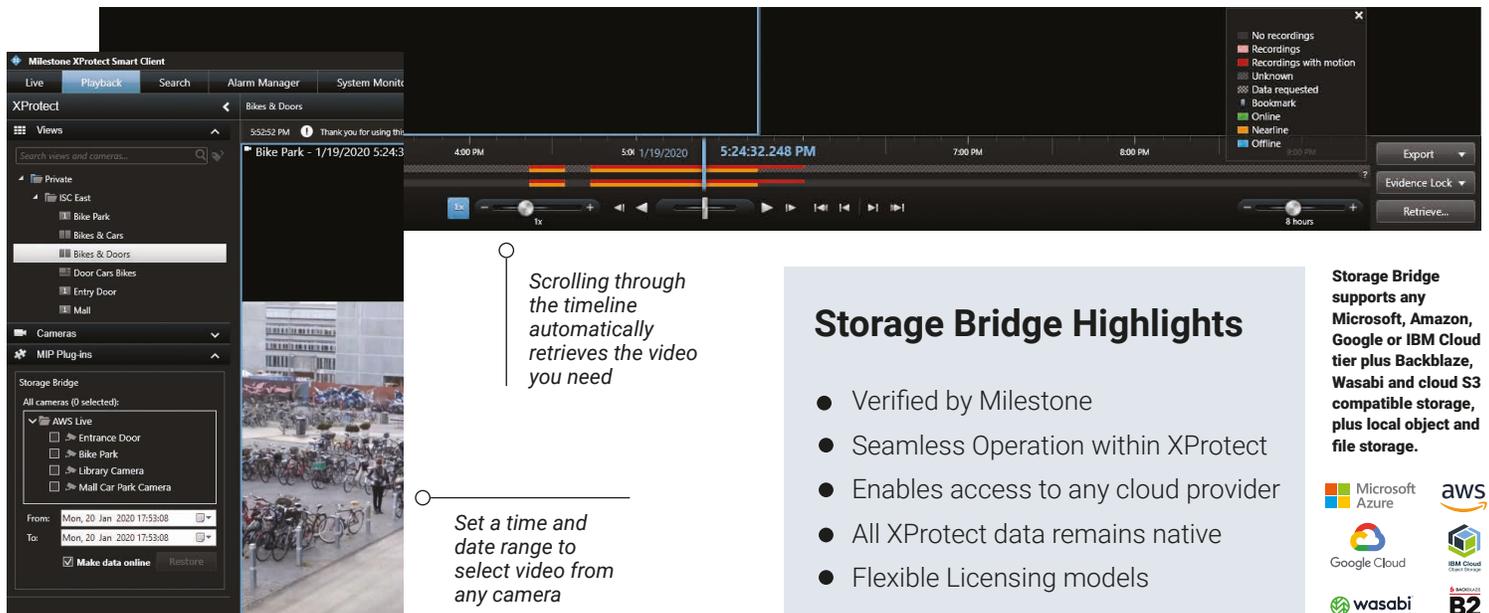

Ever-increasing storage demands with camera proliferation, hi-resolution video, and prolonged retention policies are breaking your budget. With Storage Bridge, a native MIP Plug-in for Milestone XProtect, organizations can quickly and seamlessly integrate cloud storage with their VMS storage architecture and always have room for new video recordings while saving up to 80% compared to on-premises hardware.

Verified by Milestone, Storage Bridge is the only solution that works with both live recording and archive drives. Storage Bridge automatically moves less accessed video from your local storage to affordable cloud storage tiers. Access cloud data directly from within the XProtect interface and continue working as usual. Users always have access to the recorded data – just scroll through the timeline and Storage Bridge seamlessly retrieves video to XProtect. Storage Bridge also provides the fastest possible recovery in the event of a disaster. All video and metadata needed by XProtect can immediately be available utilizing Storage Bridge.

Storage Bridge Benefits

- Always have disk space available
- Extend local storage to cloud and reduce costs
- Save high-performance local storage for active files
- Backup & archive to local disk or any cloud tier
- Fastest possible Disaster Recovery

Scrolling through the timeline automatically retrieves the video you need

Set a time and date range to select video from any camera

Storage Bridge Highlights

- Verified by Milestone
- Seamless Operation within XProtect
- Enables access to any cloud provider
- All XProtect data remains native
- Flexible Licensing models

Storage Bridge supports any Microsoft, Amazon, Google or IBM Cloud tier plus Backblaze, Wasabi and cloud S3 compatible storage, plus local object and file storage.

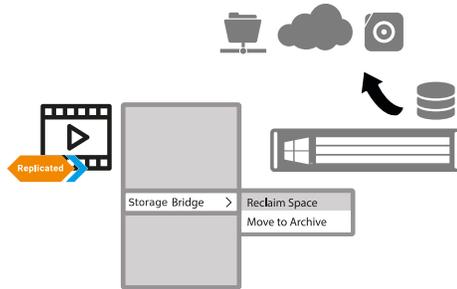

How it Works

Clients use local premium disk storage for high performance while policies work in the background to replicate and migrate infrequently accessed data to lower cost storage tiers and release valuable space.

① **Storage Bridge** dynamically tracks locally stored data.

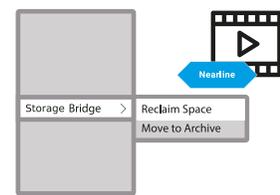

② **Active** files are kept locally and accessed at full speed and low latency.

③ **Inactive** files are migrated to lower-cost tiers, automatically or manually.

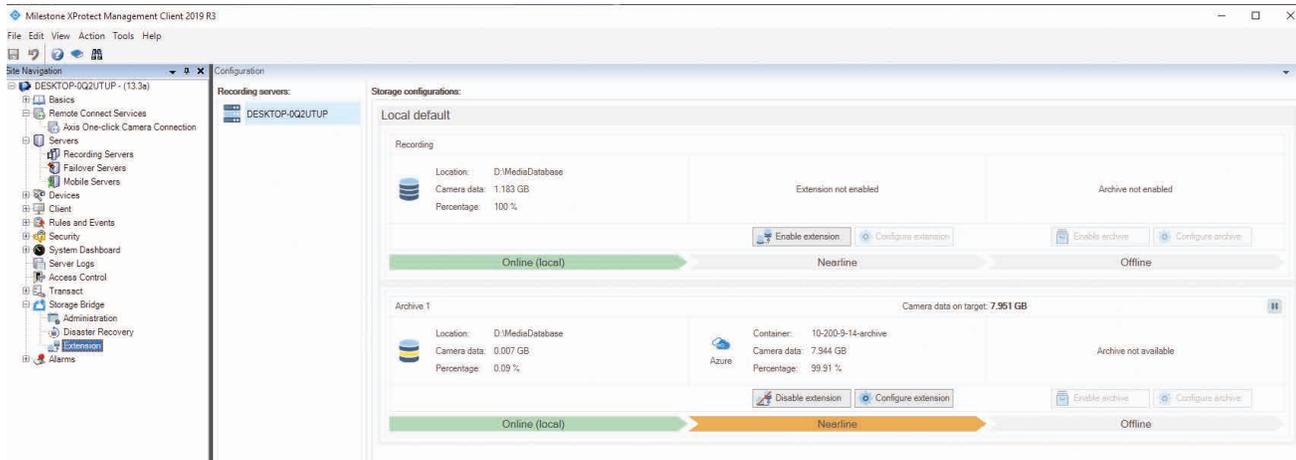

④ Data is **automatically retrieved** on-demand by users or applications.

⑤ **Tiny stub files** are maintained and visible to applications and File Explorer.

Optimize your Storage Costs

- Balance storage performance, capacity, and cost
- Use high-performance storage only for active files
- Retain and backup infrequently accessed video in the cloud

Storage Bridge is a native MIP Plug-in for Milestone XProtect and the only software solution verified to work with both live and archive drives.

“Choosing between expensive on-premises hardware upgrades versus a low monthly operating expense was easy. Bridge saved our company over half a million dollars in capex and infrastructure costs while reducing our risks of losing critical data.”

- Milestone user

Customers in over 120 countries use Tiger Technology solutions to make their data management and project workflow easier. The company develops software-only Windows cloud extension technology, high-speed NAS/SAN file system sharing, virtual volume set and virtual project workspace management, and HSM tiering and synchronization solutions. Tiger enables organizations of any size and scale to manage their digital assets on-premises, in public cloud, or with a hybrid model, and was identified by Endeavour as one of the foremost cloud technology providers on the market today.
